ACKNOWLEDGEMENT

I express my sincere gratitude to my project mentor, Mr. Ajeet Gaur, Scientist 'F', Aerial Delivery Research and Development Establishment (DRDO), Agra, for his technical guidance, constructive feedback and continuous encouragement throughout the planning, implementation and documentation of this project. His suggestions helped me evaluate the system objectively and present the work in a disciplined and technically accurate manner.

I am thankful to the faculty members of the Department of Computer Science and Artificial Intelligence, Banasthali Vidyapith, for providing the academic foundation and institutional support required to complete this project. I also acknowledge the facilities and working environment that enabled the development, testing and documentation of the aircraft-tracking application.

I would also like to thank my colleague, Avani Sharma, for her cooperation, thoughtful discussions and support during the project. Her assistance in reviewing the application workflow and presentation of the results was valuable during the final stages of the work.

Finally, I am deeply grateful to my family and friends for their patience, motivation and encouragement. Their support gave me the confidence to address the technical challenges encountered during the project and to complete this report with care and honesty.
